- Demo & Deliverables

- Contribution

Retrospective -- Sprint1 Review

Completed Work:

- Main page (activity listings)

- My Moments page (to post personal updates)

- My Events page (list of one's attended events)

- User profile page

- User login and registration page

Retrospective -- Achievements Assessment

- ✓ What Went Well:

  - User login and registration functions are working smoothly

  - Main page activity listings are clear and organized

  - User profile page design is simple and user-friendly

- ➢ Areas for Improvement:

  - Low user engagement with the My Moments feature

  - Room for enhancing overall user experience

Retrospective -- Next Steps

Specific Actions for Improvement:

- Increase visibility and user engagement with the My Moments feature to encourage content sharing

- Conduct user feedback surveys to understand user needs and optimize website functionalities

- Further optimize social interaction functions, such as comments, likes and sharing, to enhance the interactive experience between users.

Retrospective -- Next Sprint Goals

For main activity page:

- Implement a filter function in the event listings to allow users to quickly search for events based on category, place and so on.

- Enhance the event details view to include comprehensive information, images, and videos for each activity.

- Enable users to easily participate in activities by either selecting events from their homepage or searching for specific events by name or ID.

Retrospective -- Next Sprint Goals

- Implement activity search functionality

- Introduce interactive social features such as comments and chats

  - Implement a real-time chat feature that allows users to communicate with each other, discuss upcoming events, and coordinate participation.

  - Enable users to like, share, and comment on activities within their social circles, fostering a sense of community and interaction.

- Enhance user profile page with personalized settings options
